Greetings

Dear colleagues and honorable members,

We are delighted to extend our invitation to the 57th Annual Scientific Congress of the Korean Association of Orthodontists, scheduled to take place from October 9th to 11th, 2024. This year’s congress holds the overarching theme of “Big Change, Big Chance,” reflecting the dynamic advancements and opportunities within the field of orthodontics. The congress will commence on October 9th with a Pre-Congress session featuring lectures and hands-on courses on clear aligners, led by Dr. Hyun-Ji and Dr. Kenji Ojima. Additionally, we are honored to have renowned speakers, Dr. Jorge Faber and Dr. Won Moon, delivering Special Lectures that promise to provide valuable insights and knowledge. Distinguished orthodontist Dr. Young Guik Park will present the Veteran’s Lecture, focusing on the role of orthodontists in the era of the 5th industrial revolution. Drawing inspiration from member feedback, our Special Sessions have been meticulously curated to address contemporary challenges and trends. Topics such as Hospital Management, Digital Orthognathic Surgery, Sleep-Related Orthodontics, and AI-Supported Orthodontics will feature both domestic and international experts. On the final day of the congress, October 11th, we are excited to host a Joint Symposium with the Japanese Orthodontic Society, centered around the theme “Orthodontics for Seniors.” This symposium will provide a multidimensional exploration of orthodontic treatments in the context of an aging population. We encourage members to partake in the Clinical Oral Presentation sessions, offering a platform for more members to share their research and insights. Additionally, the congress will feature KAO/KAOJOS Scientific Research Presentations, lunchbox seminars, and an E-Poster session. To ensure a more enriched and enlightening scientific congress.

Seung-Hak Baek
President, Korean Association of Orthodontists

Korean Journal of Orthodontics

- JCR Impact Factor of 1.9 (2022)

**Academic Events**

**Day 1**

**Pre-Congress: Hands on Course**

1. I. Effective Treatment Planning Using the CBCT Integrated ClinCheck of the Invisalign System
   - Hyoek J. (Private Practice, Korea)
2. II. Possibility of Shape Memory Aligner
   - Kenji Ojima (Private Practice, Japan)

**Day 2**

**Special Lectures**

1. I. Navigating the Present and Future of Surgery-First Surgery for Class III Deformities
   - Jorge Faber (University of Brasilia, Brazil)
2. II. AI and Digital Takeover: Quality or Convenience, Progression or Regression, and Advancement or Demise of Orthodontics? The Future is on the Line, and Where Do You Stand?
   - Won Moon (Forsyth Institute, USA)

**Day 3**

**Veteran’s Lecture**

- How to Make the Best of 3D Images for Your Treatment?
  - Bye-Hyeong Lee (Private Practice, Korea)
- Surgical-Orthodontic Treatment Using Digital Technology in Unusual Cases
  - Sung-Hwan Choi, Jun-Young Kim (Yonsei University, Korea)
- Special Session I: Hospital Management
  - Management of the Difficult Patient
    - Bong-Jin Hahn (Department of Psychiatry and Behavioral Sciences, Seoul National University, Korea)
  - Orthodontic Office Management Based on the Patient’s Royalty and Job Engagement of the Staffs
    - Edward Chang Jin Park (Private Practice, Korea)
- Special Session II: Orthodontics for Sleep
  - Understanding AI’s Understanding of Malocclusion
    - Jeong-Ho Choi (Private Practice, Korea)
  - Increase Aligner-Confidence Leveraging Efficient Biomechanics, Optimizing Clinical Workflow, and Technology
    - Kasper Dahl Kristensen (Aarhus University, Denmark)
- Special Session III: Orthodontics by Artificial Intelligence
  - How to Make the Best of 3D Images for Your Treatment?
    - Bye-Hyeong Lee (Private Practice, Korea)
  - Surgical-Orthodontic Treatment Using Digital Technology in Unusual Cases
    - Sung-Hwan Choi, Jun-Young Kim (Yonsei University, Korea)
- Special Session IV: Orthodontics by Artificial Intelligence
  - Understanding AI’s Understanding of Malocclusion
    - Jeong-Ho Choi (Private Practice, Korea)
  - Increase Aligner-Confidence Leveraging Efficient Biomechanics, Optimizing Clinical Workflow, and Technology
    - Kasper Dahl Kristensen (Aarhus University, Denmark)
